

1.----- refer to a family of languages for expressing style sheet.

Extensible style sheet language (XSL)

2. Which EAI Siebel adapter method is useful when the search specification retrieves a large number of records?

Query page method

3. What is the input to the presentation model file?

Proxy data

4. A single styling rule can be applied to multiple web pages. True or false.

TRUE

5. ---- VIEW IS USED TO associate UI objects with files and condition expressions.

Manifest administration

6. what type of error handling available in Siebel escript marks the code which needs to handled?

CATCH

7. The Script below is written on the opportunity form applet- child to enable a button called cross sell

```
Function webapplet_preinvokemethod(MethodName,&CanInvoke)
{
If(MethodName == 'Cross Sell'){
&CanInvoke ="TRUE";
Return(CancelOperation);
}
Return(ContinueOperation);
}
```

Identify the type of event on which the script is written ?

Applet Pre Event

8. Drake, new to Siebel development is trying to create a new function.

```
Function debugger(Description,message)
```

He is unable to create the above function.can you call out the reason ?

reserve word cannot be used as a part of function

9. Shyama runs EIM process and EIM delete fails by setting the IF_ROW_STAT COLUMN to AMBIGUOUS. Please help her

EIM encounters more than one record with same user key.

10. The configuration file fails to determine whether data should be imported, merged, deleted or exported.

Ans False

11. What are the steps involved in data mapping in any EIM Process?

- **Analyze external source data**
- **Analyze Siebel destination tables and columns**
- **Select the EIM table that best maps to target base tables.**

12. Which block is always executed?

Finally

13. Custom folders are not provided in open UI Framework to store custom created /modified files. True or false?

FALSE

14. Which among these are enhanced user experience benefits of open UI?

You can use keyboard tab keys to navigate entire application.

15. Which one of these examples is the rightway to add manifest files entry.

3rd party/ custom/ salesOrderphyRen

16. Siebel EAI Provides us prebuilt adapters and enterprise connectors. True or false?

TRUE

17. What is the difference between Bool data type and Boolean data type ?

Bool data Type has value as True or false

Boolean Data Type has vale as 1 or 0

18. Which framework integrates the various application and content source of a enterprise and present them in a single user interface ?

Portal Framework

19. Which open UI customizable feature is shown.

Job Title has a value, display work and main main phone else hide them

Client-side Business logic

20. Madhuri ran the server task for data import into few tables using EIM, she sees that one of the EIM table has a IF_ROW_STAT set to “PARTIALLY_IMPORTED”. What does the value indicate?

The row did not fail for the target table, but did fail during processing of a secondary base table

21. Navigation on the UI

- **The presentation model or the Siebel renderer passes the request to proxy**
- **Proxy makes a request to the Siebel server**
- **Siebel server returns data**
- **The presentation Model applies business logic**
- **The physical renderer generates the final HTML.**

22. Open UI Framework uses open standards to render the application. select 2 of them

HTML,CSS

23. Which among these statements rightly represent conditional expression in Manifest Administration?

- **Multiple conditions can be added to determine the behavior**
- **the first true condition will be applied, and the files associated will be downloaded**
- **Evaluating of conditions stops after one of the condition evaluates to TRUE.**

24. The purpose of using only base table parameter in EIM?

To restrict the selected base column.

25. Who manages the exchange of data between external data in interface tables and user data in base tables.

Interface tables

SQL statements

EIM Configuration file

Server Task

26. Kshitij is a Siebel administrator. He wants to create a new component group. Please help him identify the right path to create component groups.

*Every button has Method Invoked Property value. This is invoked upon click of a button. Select True or False.

True

27. EAI object Manager should be online on target environment while doing online deployment. Select true or false. **True**

28. XML document contain variety of data. Identify the data it contains from the list provided.

Number

Strings

Markup Tags

Character

All of the above

None of the above

29. Which EAI Siebel Adapter method is used to make the values in a business object instance match those of an integration object instance, but does not delete any records ?

Ans. Upsert

30. Select all the operations that can be using Repository Migration Configuration Utility.

Import Repository

Export Repository

All of the above

None of the above

31. Nisha has been assigned the task for high priority (P1 ticket) bug that was found in the production system. She has been given 6 hours to fix the bug and push the changes to production. She is able to debug the script and fixes the issue on the Opportunity List Applet. She is now export the .sif file by select the applet and right click.

Identify the type of deployment.

Hot Fix

Mid-Level Releases

Incremental Compilation

32. What is a browser script in escript?

Browser Script is the script that is interpreted and run by the browser

33. oracle advises to resort from scripting .State true or false ?

Ans)True

34. select key xml features from the option provided ?

- 1)platform -independent
- 2)operating system- independent
- 3)database independent
- 4)vendor neutral language
- 5)all of the above
- 6)none of the above

Ans)All of the above

35. CSS Files contains collections of styling rules which specified the documents _____

Fill _____ up _____ the _____ blanks.

- 1)content
- 2)presentation

Ans) content

36. which of the following are correct with respect to EIM? Choose two most appropriate options ?

one base table can be populated by many interference table

one interference table can populate many base table

37. Zack wants to move huge volume of information between external application and the Siebel application.which is the best suggested method ?

- 1)ADM
- 2)**EIM**
- 3)EAI
- 4)SQL TOOLS

38. Script can be written on which of the object ?

- 1)Application
- 2)view
- 3)business object
- 4)screen

39. Which among these interacts with Siebel server and gets runtime data and metadata as required?

- 1)Physical Render (PR)
- 2)Presentation Model(PM)
- 3)Client proxy

Ans) Client proxy

40. What is browser script in eScript?

Ans- It is the script that is interpreted and run by the browser

41. EIM fails to recognize which of the following values?

System default value

Required Non-system column default values

Data (Public) default values

Required column default values

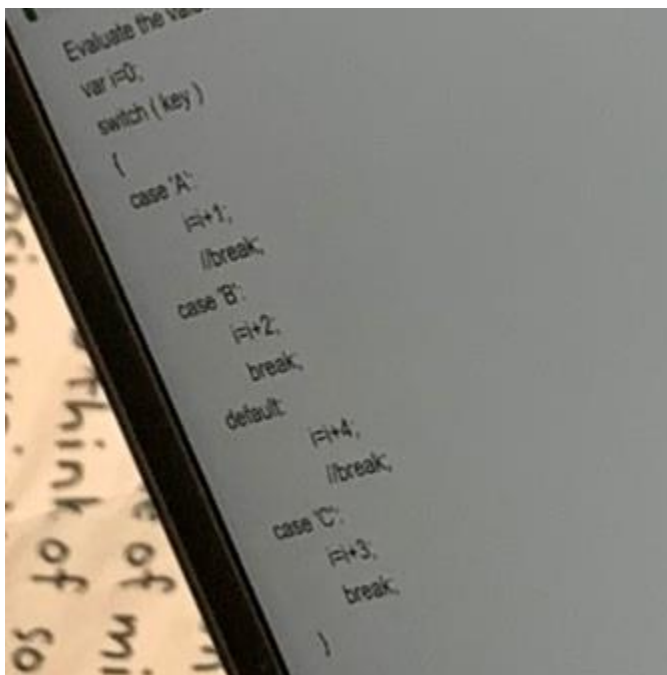

42. Anil belongs to EIM Team. He has a list of accounts and opportunities imported into the database

He logs into Siebel application to check, but he is unable to find it on Account List view

Identify the issue.

Ans. Anil does not have Account List View added under the assigned responsibility

43. Evaluate the value of i for key=c.

Ans. i=7

44. Which among these examples depict : Synchronize Siebel Data with External data ?

Siebel Web Service

45. Types of Integration Objects

External Integration object

46. Which among these are Enhanced User Experience benefits of Open UI ?

Textboxes includes spell check options

47. Predict the output for the code snippet: `var boOrder = TheApplication().ActiveBusObject();
var bcOrder = boOrder.GetBusComp("Order Entry - Orders"); var searchst = "[Id] = " +
sOrderID + """; bcOrder.SetViewMode(AllView); bcOrder.ClearToQuery();
bcOrder.ActivateField("Id"); bcOrder.ActivateField("Description");
bcOrder.SetSearchExpr(searchst); bcOrder.ExecuteQuery(); if(FirstRecord()) {
bcOrder.SetFieldValue("Description","Updated the Order Details"); }`

Description field will not be updated with the value as the value is not committed to the database

48. Why SQL Tools cannot be used to populate user data in base tables ?

Siebel has complex data model

The referential integrity is maintained by AOM by generating ROW_IDs

SQL statements cannot generate ROW_IDs

All of the Above

None of the above

49. Which among these is the right way to create an array ?

var aMonth = new Array;

50. Which EAI Siebel Adapter method is used to make the values in a business object instance match those of an integration object instance, but doesnot delete any records ?

UPSERT

51. <!ELEMENT Account (Name, status, loc?, BusinessAdress+)>

in the above statement, what does the ? Indicate

Indicates the element is optional

52. Which one of these indicators differentiate between HI and OUI

Layouts moved to CSS from SWT in OUI

53. Multiple base tables can be populated using One EIM table. State True or False.

TRUE

54. Predict the output When Accountname= SB101009877666: Switch(AccountName[0]){ case 'A': TheApplication().raiseErrorText("Account Type :A");BREAK;

Code displays: invalid account number. Account type : C

55. Steps involved in administering the manifest to apply JS file to Applet.

- **Identify the object name to apply customization**
- **configure the manifest Files**
- **Configuring the UI Object**
- **Associate the Object with the condition**
- **Associate the Condition with the files**
